Recently, Atal Innovation Mission (AIM) and Sirius, Russia launched 'AIM–Sirius Innovation Programme 3.0'

About 'AIM–Sirius Innovation Programme 3.0'

It is a 14-day virtual programme for Indian and Russian schoolchildren

The first Indo-Russian bilateral youth innovation initiative, the AIM–Sirius programme seeks to develop technological solutions (both web- and mobile-based) for the two countries.

During the week-long programme 48 students and 16 educators and mentors will create 8 virtual products and mobile applications addressing global challenges— across a range of areas such as culture, distance education, applied cognitive science, health and well-being, sports, fitness, and games training, chemistry, artificial intelligence, and digital financial assets—in the wake of the covid-19 pandemic.

Innovations developed by the student teams will leverage 21st-century technologies such as app development, artificial intelligence, blockchain, machine learning, data analytics and visualization, UI/UX, virtual reality, augmented reality, gamification, 3D design, and rapid prototyping, among others
