

Bharat Airfiber Services

August 3, 2020

The Ministry of Electronics, Communication, and IT, Govt Of India has inaugurated Bharat Air Fibre Services. It aims to offer broadband connectivity in rural areas. They are introduced by BSNL as **part of digital India initiatives**.

Bharat Airfiber Services

It aims to provide **wireless connectivity** in the **range of 20 KMs from the BSNL locations** and thus customers at remote places also will be benefitted as BSNL comes with cheapest services with support of Telecom Infrastructure Partners (TIPs). BSNL Bharat AirFibre will enable homes in rural areas with broadband services, which is different from the company's Bharat Fiber FTTH service that uses wired technology and is targeted at urban homes. BSNL Bharat Fiber offers high-speed broadband from 256 Kbps to 100 Mbps. Meanwhile, Bharat AirFibre is completely wireless and offers **broadband up to 10Mbps up to a distance of 5 Kms**.

The service **aims to connect 2.5 lakh Gram Panchayats**. BSNL's Triple Play plan that includes voice and internet services will be available for Bharat AirFibre users. Apart from this, BSNL has partnered with YuppTV to offer video technology services to the customers.

BSNL is providing the "Bharat Air Fibre Services" through local business partners and these services will give fastest internet connectivity in quick time. These services are special and different from other operators as BSNL is providing unlimited free voice calling. When BSNL will be increasing its customer base with this high technology services, at the same time BSNL is giving an **opportunity to local residents to join hands with BSNL as Telecom Infrastructure Partners**. They will earn regular monthly income

of about one lakh per month thereby becoming self-reliable under "Atma Nirbhar Bharat" initiatives of Govt of India.
