In order to improve the planning and monitoring of government projects, the Indian Space Research Organisation (ISRO) launched the Bhuvan Panchayat web portal's version 3.0.

About the portal

- The Bhuvan Panchayat web portal was launched for visualization, planning and monitoring of schemes at panchayat levels. In the project that will last for at least two years, **ISRO will collaborate with the gram panchayat members and stakeholders** to understand their data requirements.
- **The third version of the portal will provide database visualization and services for the benefit of panchayat members,** among others.
- The project is meant to provide **geospatial services to aid the gram panchayat development planning process of the Ministry of Panchayati Raj.**
- The new portal has a higher resolution and about 47 parameters in total
- The Web Geoportal is an easy to use Geo portal developed for database visualization, data analytics, generation of automatic reports, model-based products and services for the benefit of Gram Panchayat members and other stakeholders.
- **The targeted audience for this portal is Public, PRIs and different stakeholders belonging to the gram panchayats.**
