

# IMD's Flash Flood Guidance Services for South Asia

October 24, 2020

In news

Ministry of Earth Sciences dedicated Flash Flood Guidance services, first of its kind for South Asian countries namely India, Bangladesh, Bhutan, Nepal and Sri Lanka

What is it?

- The Flash Flood Guidance is a robust system designed to provide the necessary products in **real-time to support the development of warnings for flash floods about 6- 12 hrs. in advance** at the watershed level with a resolution of 4kmx4km for the **Flash Flood prone South Asian countries viz.** India, Nepal, Bhutan, Bangladesh and Sri Lanka.
- Under this the member nations that the Guidance for flash floods in the form of Threats (6 hours in advance) and Risks (24 hours in advance) will be provided
- It will enable all the member countries for issuing impact-based forecasting at the watershed and also city level, of floods which are very sudden and of short duration.
- WMO has entrusted India with the responsibility of Regional Centre of South Asia Flash Flood Guidance System for coordination, development and its implementation.

Background

There is a general lack of flash flood warning capabilities and capacities of the nations across the world. **Recognizing that flash floods have a particularly disastrous impact on lives and properties of the affected populations, the**

**Fifteenth WMO Congress had approved the implementation of a Flash Flood Guidance System (FFGS) project** with global coverage that had been **developed by the WMO Commission for Hydrology jointly with the WMO Commission for Basic Systems** and in collaboration with the US National Weather Service, the US Hydrologic Research Center (HRC) and USAID/OFDA.

**What are flash floods?**

Flash Floods are highly localized events of short duration with a very high peak and usually have less than six hours between the occurrence of the rainfall and peak flood.
