## Modhera-India's first 24×7 solar powered village

October 10, 2022

<u>In news</u>— The Prime Ministerof India has recently declared Modhera village in Gujarat as the country's first 24×7 solar powered village.

## **Key updates-**

- Located 25 km from the Mehsana district of Gurajat, village is famous for a centuries-old Sun temple built during the Chalukya reign.
- It is located on the banks of the Pushpavati river in the state.
- The village has a ground-mounted solar power plant, and over 1,300 rooftop solar systems with 1kW capacity have been installed on houses to generate electricity. All of these solar systems are linked to a battery energy storage system (BESS).
- During the day, solar panels will provide power to the village, while in the evening, BESS, India's first gridconnected megawatt hour scale battery energy storage system, will provide power to the houses.
- Both the central and state governments have invested over ₹80 crore in this solar-development project in two phases, with the state allotting 12 hectares of area for the project.
