Recently NITI Aayog released its vision for the National Data and Analytics Platform (NDAP).

Vision

Democratize access to public Government data through a world-class user experience

Mission

Standardize data across multiple Government sources, provide flexible analytics and make it easily accessible in formats conducive for research, innovation, policymaking, and public consumption

Objectives

- **User-centric: Data access is user-friendly and engaging, tailored to the needs of policymakers, bureaucrats, researchers, innovators, data scientists, journalists and citizens alike**
- **Coherent:** Multiple data sets are presented using a standardized schema, by using common geographical and temporal identifiers
- **Up-to-date:** Standard Operating Procedures are set to ensure data is updated regularly
