

National Mission for Transformative Mobility & Battery storage

August 8, 2019

Source: Press Information Bureau

Background

During the Global Mobility Summit held in September 2018, Prime Minister had outlined the vision for the future of mobility in India based on 7 C's which are Common, Connected, Convenient, Congestion-free, Charged, Clean and Cutting-edge mobility. Mobility has the potential to drive the economy forward and positively impact the lives of citizens both in urban and rural areas.

The Union Cabinet chaired by the Prime Minister has approved the

- Setting up of a National Mission on Transformative Mobility and Battery Storage, to drive clean, connected, shared, sustainable and holistic mobility initiatives;
- **Phased Manufacturing Programme (PMP)** valid for 5 years till 2024 to support setting up of a few large-scale, export-competitive integrated batteries and cell-manufacturing Giga plants in India.
- Creation of a PMP valid for 5 years till 2024 to localize production across the entire Electric Vehicles value chain.

Both PMP schemes will be finalised by the National Mission on Transformative Mobility and Battery Storage

Composition of the Mission

- The multi-disciplinary “National Mission on Transformative Mobility and Battery Storage” with an Inter-Ministerial Steering Committee will be chaired by CEO NITI Aayog.
- The Steering Committee will be comprised of Secretaries from Ministry of Road Transport and Highways, Ministry of Power, Ministry of New and Renewable Energy, Department of Science and Technology, Department of Heavy Industry, Department for Promotion of Industry and Internal Trade, and Director General, Bureau of Industrial Standards.

Role of the Mission

- The Mission will recommend and drive the strategies for transformative mobility and Phased Manufacturing Programmes for EVs, EV Components and Batteries.
- A Phased Manufacturing Program (PMP) will be launched to localize production across the entire EV value chain. The National Mission on Transformative Mobility and Battery Storage will determine the contours of PMP, and will finalise the details of such a program.
- The details of the value addition that can be achieved with each phase of localisation will be finalised by the Mission with a clear Make in India strategy for the electric vehicle components as well as battery.
- The Mission will coordinate with key stakeholders in Ministries/ Departments and the states to integrate various initiatives to transform mobility in India.

Roadmaps of the Mission

- A phased roadmap to implement battery manufacturing at Giga-scale will be considered with initial focus on **large-scale module and pack assembly plants by 2019-20, followed by integrated cell manufacturing by 2021-22.**
- Details of the PMP for Batteries shall be formulated by the Mission. The Mission will ensure holistic and

comprehensive growth of the battery manufacturing industry in India.

- The Mission will prepare the necessary roadmap that will enable India to leverage upon its size and scale to produce innovative, competitive multi-modal mobility solutions that can be deployed globally in diverse contexts.
- **The Mission will define the roadmap for transformative mobility in “New India” by introducing a sustainable mobility ecosystem** and fostering Make-in-India to boost domestic manufacturing and employment generation in the country.

Significance and Impact of the Mission

- The Mission will drive mobility solutions that will bring significant benefits to the industry, economy and country.
- These solutions will help improve air quality in cities along with reducing India’s oil import dependence and enhance the uptake of renewable energy and storage solutions.
- The Mission will lay down the strategy and roadmap which will enable India to leverage upon its size and scale to develop a competitive domestic manufacturing ecosystem for electric mobility.
- The actions in this regard will benefit all citizens as the aim is to promote ‘Ease of Living’ and enhance the quality of life of our citizens and also provide employment opportunities through ‘Make-in-India’ across a range of skill sets
