New START treaty

October 19, 2020 In news

President of Russian Vladimir Putin proposed a one-year extension of the New START treaty

What is the New START treaty?

- It is the treaty between the United States of America and the Russian Federation on Measures for the Further Reduction and Limitation of Strategic Offensive Arms
- The New START Treaty the US- Russia came into force on February 5, 2011.
- Under the Treaty, the United States and Russia must meet the Treaty's central limits on strategic arms by February 5, 2018; seven years from the date the Treaty entered into force.
- Each Party has the flexibility to determine for itself the structure of its strategic forces within the aggregate limits of the Treaty.
- These limits are based on the rigorous analysis conducted by Department of Defense planners in support of the 2010 Nuclear Posture Review.
- No Constraints on Missile Defense and Conventional Strike: The Treaty does not constrain testing, development, or deployment of current or planned U.S. missile defence programs or long-range conventional strike capabilities.

Aggregate limits:

- 700 deployed intercontinental ballistic missiles (ICBMs), deployed submarine-launched ballistic missiles (SLBMs), and deployed heavy bombers equipped for nuclear armaments;
- 1,550 nuclear warheads on deployed ICBMs, deployed

SLBMs, and deployed heavy bombers equipped for nuclear armaments (each such heavy bomber is counted as one warhead toward this limit)

• 800 deployed and non-deployed ICBM launchers, SLBM launchers, and heavy bombers equipped for nuclear armaments.
