

# Participatory System (PGS)

# Guarantee

February 6, 2021

## What is the PGS, and how does it work?

- Participatory Guarantee System for India (PGS) PGS is another process of certifying organic products.
- The certification is in the form of a documented logo or a statement. It is implemented by the Ministry of Agriculture and Farmers' Welfare.
- PGS is a process of certifying organic products, which ensures that their production takes place in accordance with laid-down quality standards. According to 'Participatory Guarantee System for India [PGS-India]', an 'Operational Manual for Domestic Organic Certification' published in 2015 by the National Centre of Organic Farming, Ghaziabad, under the Ministry of Agriculture's Department of Agriculture and Cooperation, PGS is a "quality assurance initiative that is locally relevant, emphasize the participation of stakeholders, including producers and consumers, and operate outside the framework of third-party certification".
- According to a 2008 definition formulated by the International Federation of Organic Agriculture Movements (IFOAM), the Bonn-based global umbrella organisation for the organic agriculture movement, PGSs are "locally focused quality assurance systems" that "certify producers based on active participation of stakeholders and are built on a foundation of trust, social networks and knowledge exchange".
- PGS, according to this definition, is a process in which people in similar situations (in this case smallholder producers) assess, inspect and verify the production practices of each other and take decisions on organic certification".

## The main objectives of the programme are:

- To ensure food security and improved livelihoods of organic producers and collectors/harvesters through effective and efficient implementation of PGS Organic;
- To promote agro-ecological practices, environmental conservation and fair price for producers and collectors/harvesters
- To provide nutritive and guaranteed organic produce to consumers with primary focus on domestic consumers;
- To draw up the norms and standards and the total system of Local Groups and PGS Organic Facilitating Councils (PGSOFCs) for implementation among the producers, with special emphasis on poor, marginal farmers, sharecroppers, NTFP collectors and harvesters;

## Four pillars of PGS

The government's 2015 PGS manual underlines that the system in India is based on "participatory approach, a shared vision, transparency and trust".

- **Participation:** Stakeholders such as producers, consumers, retailers, traders, NGOs, Gram Panchayats, and government organisations and agencies are collectively responsible for designing, operating, and decision-making. Direct communication among the stakeholders helps create an integrity- and trust-based approach with transparency in decision-making, easy access to databases and, where possible, visits to farms by consumers.
- **Shared Vision:** Collective responsibility for implementation and decisionmaking is driven by a common shared vision. Each stakeholder organisation or PGS group can adopt its own vision conforming to the overall vision and standards of the PGS-India programme.
- **Transparency:** At the grassroots level, transparency is maintained through the active participation of producers

in the organic guarantee process, which can include information-sharing at meetings and workshops, peer reviews, and involvement in decision making.

- **Trust:** A fundamental premise of PGS is the idea that producers can be trusted, and that the organic guarantee system can be an expression and verification of this trust. The mechanisms for trustworthiness include a producer pledge made through a witnessed signing of a declaration, and written collective undertakings by the group to abide by the norms, principles and standards of PGS.

### **Advantages PGS**

- Procedures are simple, documents are basic, and farmers understand the local language used.
- All members live close to each other and are known to each other. As practising organic farmers themselves, they understand the processes well.
- Because peer appraisers live in the same village, they have better access to surveillance; peer appraisal instead of third-party inspections also reduces costs
- Mutual recognition and support between regional PGS groups ensures better networking for processing and marketing.
- Unlike the grower group certification system, PGS offers every farmer individual certificates, and the farmer is free to market his own produce independent of the group.

### **Limitations of PGS**

- PGS certification is only for farmers or communities that can organise and perform as a group within a village or a cluster of contiguous villages, and is applicable only to farm activities such as crop production, processing, and livestock rearing, and off-farm processing “by PGS farmers of their direct products”.

- Individual farmers or groups of farmers smaller than five members are not covered under PGS. They either have to opt for third party certification or join the existing PGS local group.
- PGS ensures traceability until the product is in the custody of the PGS group, which makes PGS ideal for local direct sales and direct trade between producers and consumers.

## **International Federation of Organic Agriculture Movements (IFOAM)**

- Founded in 1972, IFOAM – Organics International is a membership-based organization working to bring true sustainability to agriculture across the globe.
- IFOAM – Organics International wants to be a part of the solution.
- Together with members in over 100 countries and territories as well as regional bodies and sector platforms, leading change, organically!

### **Vision**

- Foster the broad adoption of truly sustainable agriculture, value chains, and consumption in line with the principles of organic agriculture

### **Mission**

- Leading change, organically.
