

ReUnite Mobile app

June 23, 2019

Mobile application called ReUnite which helps to track and trace missing and abandoned children in India was launched recently. The app was developed by NGO, Bachpan Bachao Andolan & Capgemini for developing this app.

The app is multiuser where parents and citizens can upload pictures of children, and provide detailed description like name, birth mark, address, report to the police station, search and identify missing kids. The photographs will not be saved in the mobile phone's physical memory. Amazon Rekognition, web facial recognition service, is being used to identify missing kids. The app is available for both Android and iOS.
