## Sheshachalam Reserve

## **Biosphere**

August 10, 2020 Why in news?

> Scorching heat has forced animals out of Seshachalam biosphere in the 2019 summer.

## Seshachalam Biosphere Reserve:

- The Seshachalam Hills are hilly ranges in part of the Eastern Ghats in Andhra Pradesh and spread over Chittoor and Kadapa districts.
- It was designated as a Biosphere Reserve in 2010.
- **Tirupati**, a major Hindu pilgrimage town **and the Sri** Venkateshwara National Park are located in these ranges.
- It is **home to a number of endemic species** including the famous **Red Sanders and Slender Loris**.
- Tribes of Yanadis are the native population of the reserve.
